

MAFI 91255

Seam Bracket

Seam roof

About the Product

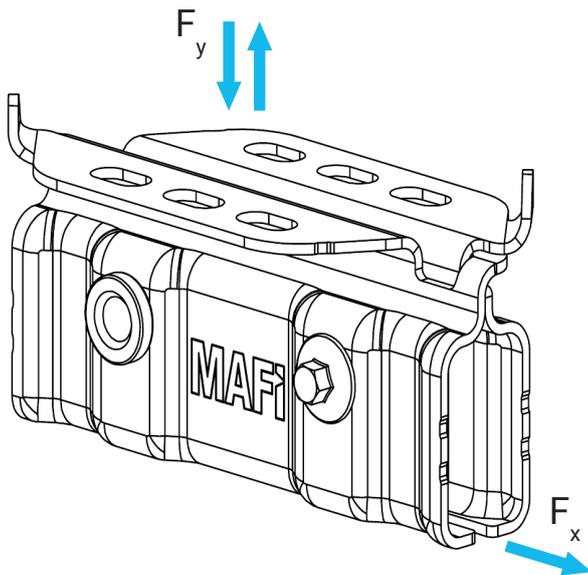

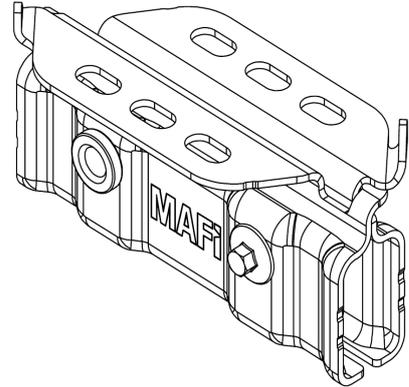

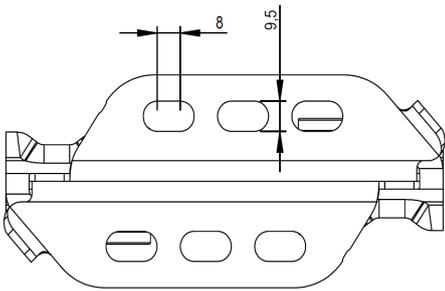

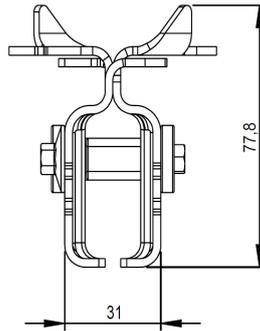

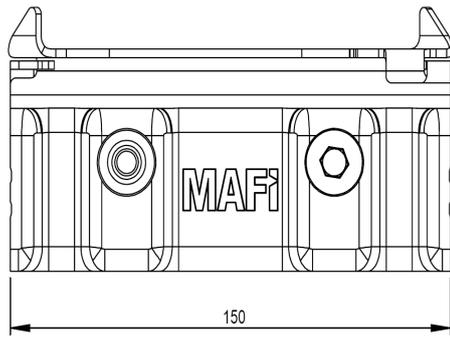

The Seam Bracket is designed to not damage the seam and it fits both double folded seams and 'click seams'. The Seam Bracket is made from Magnelis[®] and it is IP-protected.

Flexibility

The Solar Rail can only be installed horizontally. When installed horizontally, the bracket has a versatile equipment hole pattern for matching the clamping zone of the panel and a stop hook to temporarily support the Solar Rail before mounting. It is tightened with 16 Nm using only one tool, the same HEX8 tool as with all other fasteners in the MAFI Solar product portfolio.

Measurements in millimeters

Info

Ultimate design load

$F_{y \text{ down}}$ max: 2000 N (0°)*

$F_{y \text{ up}}$ max: 1000 N

F_x max: 1500 N (90°)*

*Ultimate design load for different roof slopes can be found in table.
