

MAFI 91292

Plegel Spacer

About the Product

The Plegel Spacer is designed to fit the sinus shape and to adjust for the angle on tile-shaped metal sheet roof ('Plegel') which makes the panel aligned with the Solar Rail. The guide pin shall always be directed towards the ridge line and prevent the Plegel Spacer from slipping beneath the Solar Rail during installation.

Flexibility

The Solar Rail can be installed both horizontally and vertically due to the universal hole pattern in the Plegel Spacer.

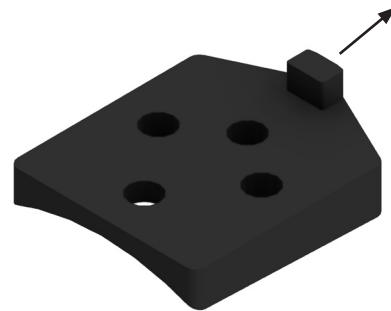

How to Order

To order, please contact MAFI quoting article number:

MAFI 91292

Please visit <https://www.mafigroup.com/how-to-order/> for regional contact information.

Always point the guide pin towards the ridge line
