Compatibility of MAFI Clamps with Peimar SF Series PV Modules

With this communication Peimar company formally confirms that Peimar SF Series PV modules are mechanically compatible with MAFI clamps revB, provided that installation is carried out in compliance with Peimar's installation guidelines and the specifications provided by MAFI.

In particular:

- Clamps must be positioned within the defined mounting zones, as specified in the Peimar installation manual;
- The tightening torque must comply with MAFI's technical recommendations and must not compromise the integrity of the module frame;
- When properly installed, the use of MAFI clamps does not affect the certified mechanical resistance of the modules to wind and snow loads.
